PROFILE SUMMARY

Automation and Control professional with hands-on industrial experience in PLC-controlled machine troubleshooting, automated production equipment, servo motor systems, breakdown and preventive maintenance, failure analysis, root cause analysis, and machine sequence analysis. Practical exposure to industrial instrumentation, pressure switch calibration, gauge comparator, PLC-based machine control, SCADA monitoring, industrial sensors, and field devices. Skilled in Siemens TIA Portal and CODESYS through self-developed PLC simulation projects involving ladder logic, sensors, timers, counters, machine sequencing, interlocking, and Auto/Manual control. Strong foundation in Industrial Automation, PLC Control, Instrumentation, Motion Control, and Machine Troubleshooting, with a focused interest in PLC Programming and Automation Engineering roles.

PROFESSIONAL EXPERIENCE

Automation Technician

11/2025 – Present

Salcomp Technologies India Pvt. Ltd.

- Troubleshoot PLC-controlled production machines during breakdowns and machine stoppages to minimise downtime.
- Monitor machine operation and PLC status to identify faults and prioritise recovery actions.
- Perform breakdown maintenance on automated production equipment to restore machine operation quickly.
- Carry out preventive maintenance activities on automation and machine-control equipment to improve reliability.
- Perform Failure Analysis (FACA) for machine failures and recurring breakdown patterns.
- Conduct Root Cause Analysis (RCA) to identify causes of recurring machine problems and support corrective actions.
- Perform servo motor teaching and alignment activities as required for machine operation.
- Review machine sequences, interlocks, and operating conditions to resolve automation-related faults.
- Support production teams during machine breakdowns and assist in restoring equipment operation with minimum downtime.

EDUCATION

Bachelor of Engineering (ECE)

06/2021 – 08/2025

Jeppiaar Institute of Technology

Chennai

CGPA: 7.9

LANGUAGES

- English
- Tamil
- Telugu

TECHNICAL SKILLS

PLC & Programming

Siemens PLC (TIA Portal),
CODESYS, PLC Programming,
Ladder Logic, PLC
Troubleshooting, I/O Monitoring

Industrial Automation

Machine Sequence Control,
Interlocking, Industrial Automation
Systems, Pneumatic & Electro-
Pneumatic Systems

Instrumentation

Pressure Switch Calibration, Gauge
Comparator, Thermocouples, Load
Cells, Industrial Sensors & Field
Devices

Motion Control

Servo Motor Teaching, Servo
Alignment, Motion Control
Systems, Parameter Tuning

Maintenance & Troubleshooting

Breakdown Maintenance,
Preventive Maintenance (PM),
Failure Analysis (FACA), Root
Cause Analysis (RCA)

Industrial Systems

SCADA Monitoring, MES
Exposure

INDUSTRIAL TRAINING

MRF Ltd.

06/2025 – 10/2025

In-Plant Training – Instrumentation & Automation

- Collaborated with the Instrumentation team and gained hands-on exposure to industrial instrumentation and automation systems.
- Performed calibration of pressure switches and other instrumentation devices using a gauge comparator.
- Assisted with PLC program upload/download activities and gained practical exposure to PLC-based machine control.
- Gained practical knowledge of industrial automation systems through direct involvement in instrumentation and control activities.
- Monitored SCADA systems to observe process and machine status and support effective process oversight.
- Worked with industrial field devices, sensors, and control instruments used in manufacturing processes.
- Participated in instrumentation and maintenance-related activities and coordinated with team members during project activities.

First Class Engineering Pvt. Ltd.

07/2024 – 08/2024

Intern

- Gained hands-on exposure to plastic manufacturing processes and industrial production equipment.
- Developed practical understanding of shop-floor operations, production workflows, and industrial safety practices.
- Monitored machine operations and supported day-to-day manufacturing activities during production shifts.

PLC SIMULATION PROJECTS

Siemens PLC Simulation – TIA Portal

- Developed and tested PLC control logic using Siemens TIA Portal in a simulation environment.
- Implemented sensor-based machine sequences using Ladder Logic, timers, counters, and logical control conditions.
- Created Auto/Manual operating modes with interlocking logic for machine control.
- Simulated PLC inputs and outputs to verify machine sequence operation.
- Monitored program execution and debugged Ladder Logic during simulation.

PLC Simulation – CODESYS

- Developed and tested PLC control logic using CODESYS in a simulation environment.
- Implemented sensor-based machine sequencing using timers, counters, and logical conditions.
- Created Auto/Manual operating modes and interlocking logic.
- Simulated input and output conditions to verify machine operation.
- Tested and debugged PLC logic through program monitoring.
